Scale Model Life Magazine Volume 8

The newest edition of [Scale Model Life is out](#). Actually, it's been out about a month, I'm just getting around to posting it. It's a busy time right now!

This issue features a Dodge Monaco, the George Barris Bathub Buggy, the AMT Depth Charger Aqua Rod, a Hasbro Terrain Cruiser, a Lindberg Dodge Charger State Trooper car, and a 1/12 scale Tom Daniel Red Baron kit. A few of these were in some older books I did years ago, but I've included them with more text and more (better) images. The others are fresh off the model bench.

This is Volume 8, and it's taken longer than I always plan on getting the magazine done. I build the models myself, one at a time, so that can take more time than I thought it would, depending on the subject. Cars aren't to bad, because in some respects, they're all similar. But they can still pose issues that need to be solved, and problems to work out. Often times I'm waiting on supplies. Paint, another donor kit, or something I didn't plan on when I started the model. I am already working on the next issue, and I'm excited about some of the models that will be included. It will be cars again, as far as the subjects. Though, I'm thinking there's another Scifi edition on the near horizon.

So if you've been waiting for the newest issue, now's the time to get yours. And remember, always drop me an email if you have a question about the models in the book. There isn't room to fit everything inside, so sometimes things get missed. I'm glad to help where I can. Enjoy!
