Related Categories: Books and Mags

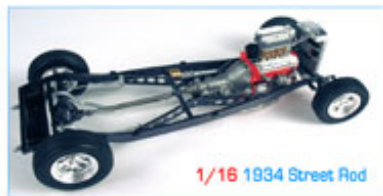

The all new Premiere Issue of **Scale Model Life Magazine** is out.

This issue covers several model car builds. Including the 1/8 scale Revell 1932 Ford Hot Rod. There's plenty of chrome on that kit, and a modified Ford 302 V8. Along with the car, you can see how the Moebius Models Black Widow kit can be modified to represent a great 1/8 scale Show Girl to go with your Hot Rod.

The magazine also features a build of Aoshima's Toyota Twin Turbo GT. This model includes the engine, so it makes a perfect sleeper car kit, but has plenty of engine detail to make a great model build. Also along those lines, there's a build of Monogram's Mazda RX7, featuring the famous 13B Rotary engine.

Moebius Models makes another entry with their Wayne Industries Tumbler Batmobile. See how this unusual kit is assembled, and why it's different than any car kit you've ever built before. Of course, you can never have enough Hot Rods, so we've thrown in an older kit, Revell's 1/16 Street Rod. This kit represents a modern 1934 Rod with modern disc brakes, a small block Chevy 350, and custom chassis.

So be sure get your issue today!

The Scale Model Life 'zine puts together some of the coolest models around, with two Big Scale kits ,featuring the Revell '32 and '34 Fords. Next up is a screamin' Toyota Twin Turbo Mark II GT, the Wayne Industries Tumbler, a Mazda 13B RX-7, and a Hot Show Girl Figure kit. This issue is packed full of model How-Tos, building tips, and color images. Get your very own copy today!
